

COVID-19 TESTING PREPAREDNESS

Puerto Vallarta & Riviera Nayarit have been working diligently with local authorities and health facilities to ensure the safety and wellness of its visitors. In addition to implementing extensive wellness and safety protocols, both destinations are fully prepared to assist all travelers who require COVID-19 testing prior to their departure.

WHAT YOU NEED TO KNOW:

• WHAT:

- As of January 7, 2021, all air travelers flying to Canada, regardless of citizenship, must present a negative COVID-19 viral test result administered within three days (72 hours) before departure. The test must be performed using either a molecular polymerase chain reaction (PCR) or Loop-mediated Isothermal Amplification (LAMP).

- As of January 26, 2021, all air travelers arriving in the United States will be required to present a negative COVID-19 viral test result administered within three days (72 hours) before departure. The test must be a viral detection test for current infection (i.e. a molecular polymerase chain reaction (PCR) test, nucleic acid amplification (NAAT) test or viral antigen test) approved or authorized by a relevant national authority for the detection of SARS-CoV-2. COVID-19 viral test results may be presented to the airline in either paper or electronic form.

- If test results are not presented, passengers will be automatically denied boarding.

• WHO:

- For Canada, all travelers ages five and above are required to present a negative COVID-19 test result.
- For the United States, all travelers age two and above are required to present a negative COVID-19 test result.

• WHERE & HOW:

- Puerto Vallarta & Riviera Nayarit have several hospitals, laboratories and clinics, that offer COVID-19 PCR and Antigen testing with special rates for U.S. and Canadian citizens, including Hospital Joya, Hospital CMQ and Hospital Punta Mita. Travelers are encouraged to make their appointment directly with the facility upon arrival to the destination. Please refer to the below chart for additional information.

- Some hotels in the destination are facilitating testing on-site. Guests must contact the property directly for more information.

WHAT IF:

- **A traveler tests positive** prior to their departure, they must quarantine for 14 days in the destination by making arrangements with their hotel or preferred accommodation option. Travelers should contact hotels directly for information about discounted rates and isolated accommodations and services.
- **A traveler has taken the vaccine**, they must still present a negative COVID-19 test result to the airline if flying to the U.S.
- **A traveler tests positive** after recovering, they can present written or electronic documentation of recovery from COVID-19 after previous infection in the form of a positive viral test result with a letter from a licensed healthcare provider or public health official stating the passenger is cleared for travel.

Additionally, the following Puerto Vallarta & Riviera Nayarit hotels offer on-site testing. Please contact them directly for full details.
